

Data Cleaning & Preparation - Project 1 Change Log

Intern Name: Omar Eissa Ibrahim Wahdan

Batch: 2026

Domain: Data Analytics

Overview:

The following log documents the data integrity transformations applied to the raw dataset to achieve a 0% error rate on unique identifiers and date formats, in adherence to Decode Labs strict cleaning guidelines. Listwise deletion was completely avoided to preserve statistical power.

Integrity Audit & Modifications Log:

Change ID	Description	Impact	Status
CR001	Removed duplicated records based on the primary Order ID column.	Eliminated inflated transaction counts; ensured 100% unique identifiers.	Resolved
CR002	Formatted all Date values to strict ISO 8601 standard (YYYY-MM-DD).	Reached 0% error rate on Date Formats across the dataset.	Resolved
CR003	Imputed missing numeric values (Nulls) using the column Median.	Preserved records entirely; avoided Listwise Deletion and maintained statistical power.	Resolved
CR004	Applied Proper Case and Trimmed Whitespaces for all string/text columns.	Standardized naming conventions (e.g., City names) ensuring "One Truth, One Record."	Resolved
CR005	Standardized numeric precision for financial/amount columns.	Set all values to exactly 2 decimal places for consistent aggregation.	Resolved
